www.brahmifed.com

Who are we

We are a private limited company duly registered under the company's act 1956, in the name - **M/S Maa Luxmi Devi Agro Pvt. Ltd.** We are an **ISO 9001:2015 certified company** located in **Village-Nanhera, Tehsil-Rajpura, Distt-Patiala, Punjab (India).**

Brahmi® is a Registered Trademark & We are into the manufacturing of a wide range of High Quality balanced Cattle Feed and its allied products with the latest technology. We are into the manufacturing of cattle feed since 2015 and have a solid presence in many states like Punjab, Haryana, Himachal Pradesh, Uttar Pradesh, Rajasthan & Jammu Kashmir, etc.

Brahmi® has all the latest facilities like an in house full-fledged laboratory for testing raw materials & finished goods to check and keep control of Quality parameters. We have latest & up to date plant and machinery and have technology to sterilize cattle feed through steam and to produce cattle feed pellets in different sizes and also in mesh form, considering dairy farmer needs.

Our feed contains all necessary natural ingredients like maize, rice bran, mustard oil cake D.O.C mustard, cottonseed meal, bajra, full-fat soya, soya bean, Chelated vitamins, trace minerals, live yeast, buffer, DCP, etc. to make it more effective than any other cattle feed in the market.

Our mission is a promise to bring better nutrition for cattle at a genuine & affordable price. There is a lot more to animal feed than simply achieving a high level of production. We want to help dairy farmers gain comprehensive and stable growth in business through our products.

Overall Conclusion

- Population is growing.
- Shortage of land for Green fodder due to Urbanization.
- Milk production per animal in India is very lesser than other countries.
- Majority of feed manufacturers are not producing feed as per animal's genetic Potential.
- Non Availability of pure vitamins and minerals in markets.
- Problems of Repeaters are very common
- No support system for Home Mix/Cheap Quality Feeds
